

## Difference between HDD for SURVEILLANCE & ENTERPRISE

Requirement	Desktop HDD	Surveillance/AV HDD	Enterprise HDD
<b>Operational Availability</b>	8 hours/day - 6 days/week	24 hours/day - 7 days/week	24 hours/day - 7 days/week
<b>Work Load</b>	10 - 20%	60-70%	100%
<b>Performance</b>	Low to Moderate	Moderate to High	High
<b>Reliability</b>	Moderate:	High:	High:
	1. Outage affects only one user	1. Outage affects multiple users	1. Outage affects multiple users
	2. Lower Mean Time Between Failure	2. Higher Mean Time Between Failure	2. Higher Mean Time Between Failure
<b>Data Integrity</b>	Moderately desirable (a bit corruption may result in critical data loss on one system)	Highly Desirable (a bit corruption may result in critical data loss to multiple clients)	Highly Desirable (a bit corruption may result in critical data loss to multiple clients)
<b>Durability</b>	Short usable life	Moderate usable life	Long usable life
